Dave Keune

About

Straight dynamics.

Straight lines symbolize man's course to cultivate, to focus on determined targets by a specific mindset. Within this frame, a vibrant poetical field can manifest, adding up to our human condition. Just within this straight human condition, designer Dave Keune operates.

Straight lines can have many dynamics.

As a condition, straight lines can result in a range of expressive forms, playful to monumental, abstract to figurative.

As a condition, straight lines can result in a range of dynamic applications, by man or machine guided motion.

The design of Dave Keune targets both esthetical as functional values. While developing his design, either products or environments, Keune operates through layers of research, development and production. By applying skilled craftsmanship within the production process, he aims for high-qualified results, in usability and durability.

Conditions

All services are delivered under the General Terms and Conditions of the Association of Dutch Designers (B.N.O.).
