

# Prefab

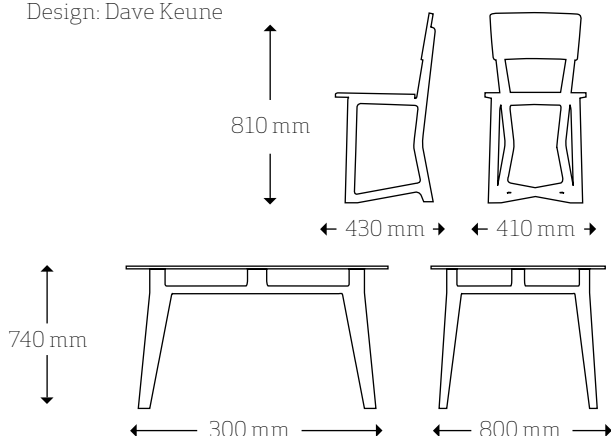

## Prefab / furniture

Prefabdesign is a furniture collection with designs that are sold as a kit. Due to the wide range of chairs ( Decker ), tables ( Deck ) and cupboards ( Loader ) the costumer can choose between many different designs. Because of the simple production-method, the designs can be of low cost. Therefore Prefabdesign makes design accessible to everyone, due to the wide range of furniture and the fact that it can be self assembled, everyone can customize his own furniture. Prefabdesign was my Graduation project at the Design Academy. Goal of the project was to design for the masses, to give people design that they can learn from for a low price and to get them out of the grasp of massconsumption.

## Technical information

Material: Plywood  
Design: Dave Keune

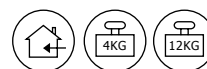

## Prefab /Meubilair

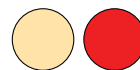

*Prefabdesign is een collectie waarvan de meubels worden aangeboden als bouwpakket. Dankzij het aanbod van stoelen ( Decker ), tafels ( Deck ) en kasten ( Loader ) heeft de consument een uitgebreide keuze. De eenvoudige productietechniek zorgt ervoor dat de serie goedkoop in massa geproduceerd kan worden. Op deze manier is design beschikbaar voor iedereen, en kan men dankzij het brede aanbod en "het zelf assembleren" de meubels zo maken zoals hij wil.*

## Technische informatie

Materiaal: Multiplex  
Ontwerp: Dave Keune
